

Global Classroom Autumn 2017

Field Operations Research to Address Pressing Issue in Waste Management in Dhaka, Bangladesh

* Get Connected

* Share Learning Experiences

* Engage in Public Health

WHY IS THIS IMPORTANT?

Household trash and human waste is one of the most pressing global issues, posing increasingly significant public health threats locally and globally

WHAT SKILLS WILL YOU GAIN?

- Experience hands-on applications in the international public health field
- Gain tools to conduct operational research, identify successful interventions, formulate processes for new interventions
- Develop cultural competence and professional relationships through global networking

“A unique opportunity that truly takes students outside of the classroom and into the professional world to work with a global team and contribute to real-life global public health challenges” – *Mia Hassler, UMD, USA*

“Global classroom was a unique opportunity to get high quality education from Bangladesh. Thanks IUB-UMD partnership for providing these facilities to the Bangladeshi students” – *Ruhi, IUB, Bangladesh*
